The global equity and bond markets have undergone a severe correction in the past six months. Investors have many questions which merit careful consideration, such as:

- With world inflation at a 40 year high, are there echoes of 2011 with the recent Italian bond spreads widening from core European bonds rates?
- Lessons learnt from the last five bear markets, i.e. of 1982, 1991, 2001, 2008 and 2020.
- During the pandemic, investment managers successfully rotated into Technology. Subsequently, Investment Managers have rotated away from Technology to “value” stocks. What can we now expect?
- How Investment Mangers help in the battle to reduce our carbon footprint by enabling you invest in assets with goals of ESG (Environmental, Social, and corporate Governance).
- The investment outlook for the other three asset classes, i.e. deposits, alternatives and property.

Andy Ivory-Corr will discuss these (and other) pressing issues, and also present New Ireland’s views on how investors should set themselves up for the years ahead.

*Most importantly, we want to ensure that we are addressing the issues that matter most to our clients. Accordingly, we would greatly appreciate it, if you could let us know in advance **if there are any specific topics which you would like Andy to address.** Please send your topic(s) to sean@abm.ie or eoin@abm.ie*
